

ANTIBLOCKMB:HPABF101

Product description

The MB HPABF101 contains synthetic silica, recommended for providing antiblock properties to LDPE film and to facilitate the opening of bags in PE. The granular shape of this MB, being very similar to that of the polyolefin resin in terms of size and density, allows an easy mixing/dispersion with the raw materials.

Specifications (Reported on CoA)

Content synthetic SILICA	19-21%	M ABF
--------------------------	--------	-------

Additional Typical Values

Appearance	Whitish Granules	M001
Bulk Density	0.54-0.63	M003

Recommendations of use

Addition levels of MB HPABF101 depend on various factors such as thickness of the article, expected service life, presence of fillers and other additives and commonly range from 1.0-2.5%. Synthetic silica is used in cases where excellent optical properties are required. Contact us for your specific recommendation needs.

Packaging

MB HPABF101 is supplied in 25 kg plastic bags on 1000 kg or 1375 kg wooden pallets.

Storage Conditions

It is recommended to avoid the exposure of MB HPABF101 to sunlight and high temperatures for longer times as this may impair the quality of the MB. Storage lifetime is 1 year.
